

User Manual Smoke Detectors

Manual de Uso Sensores de Humo

EN

The apartment is equipped with two smoke detectors that will activate if smoke is detected. One is located in the kitchen area, and the second is on the ceiling above the bed.

Smoking inside the apartment is strictly prohibited. The kitchen smoke detector may be triggered by excessive smoke while cooking, so it is recommended to always turn on the exhaust hood.

ESP

El sistema de aire acondicionado funciona utilizando el control remoto. El apartamento está equipado con un sistema de ahorro de energía, por lo cual si se detecta una ventana abierta apagará de forma automática el funcionamiento del mini split.
